CompTIA Server+ Training

CompTIA Authorized Training · Applied Technology Academy

CompTIA Server+ is the only certification that can ensure that IT professionals at the administrator level are able to do the job in any environment because it is the only certification not restricted to a single platform. The exam covers essential hardware and software technologies of on-premise and hybrid server environments including high availability, cloud computing, and scripting. The new exam includes performance-based questions that require the candidate to demonstrate multi-step knowledge to securely deploy, administer, and troubleshoot servers.

LEVEL	DURATION	EXAM	EXPERIENCE	AVERAGE SALARY
Advanced	**5 Days**	**SK0-005**	**2 years: Server environment (A+ recommended)**	**$70,120**

Course Overview

CompTIA Server+ is a global certification that validates the hands-on skills of IT professionals who install, manage, and troubleshoot servers in data centers as well as on-premise and hybrid environments.

CompTIA Server+ now features flexible training options including self-paced learning, live online training, custom training, and labs to advance the career development of IT professionals in server administration.

The course covers the server lifecycle in the following themes:

- Server, virtualization, and security concepts
- Managing physical assets, server hardware, and storage configuration
- Installing, troubleshooting, and maintaining a server operating system
- Managing data security, service and data availability, and decommissioning servers

In addition, increased focus has been placed on the needs of virtualization in systems administration and troubleshooting is covered throughout the course.

Course Outline

- **Lesson 1: Understanding Server Administration Concepts**
- **Lesson 2: Understanding Virtualization and Cloud Computing**
- **Lesson 3: Understanding Physical and Network Security Concepts**
- **Lesson 4: Managing Physical Assets**
- **Lesson 5: Managing Server Hardware**
- **Lesson 6: Configuring Storage Management**
- **Lesson 7: Installing and Configuring an Operating System**

- **Lesson 8: Troubleshooting OS, Application, and Network Configurations**
- **Lesson 9: Managing Post-Installation Administrative Tasks**
- **Lesson 10: Managing Data Security**
- **Lesson 11: Managing Service and Data Availability**
- **Lesson 12: Decommissioning Servers**

Intended Audience

This Server+ training is considered foundational-level CompTIA training, which means it was designed for systems administrators. It is a valuable server technologies skills course for new IT professionals with at least a year of experience with proprietary and open source server technologies and experienced systems administrators looking to validate their CompTIA skills.

Prerequisites

To ensure your success in your course you should have 18 to 24 months of hands-on experience with installation, configuration, diagnosis, and troubleshooting of PC hardware and network operating system issues. It is also recommended that you have the CompTIA A+ certification or the equivalent training and experience.

Follow-On Courses

- CompTIA Cloud+
- CompTIA CySA+
- CompTIA PenTest+
- CompTIA SecurityX
