- Lessons learned and process improvement
- Business continuity and disaster recovery integration

Intended Audience

Designed for those who manage, design, oversee, and assess an enterprise's information security function.

Prerequisites

Five years of work experience in information security management, including:

- At least three years of management experience in at least three of the four CISM domains
- Experience waivers of up to two years are available based on education or other certifications
- There is no required training to take the exam, though formal study is strongly recommended

Follow-On Courses

- Certified Information Systems Auditor (CISA)
- Certified in Risk and Information Systems Control (CRISC)
- Certified in Governance of Enterprise IT (CGEIT)
- Certified Data Privacy Solutions Engineer (CDPSE)

Course Objectives

Upon completion of the CISM exam preparation course, delegates will:

- Align information security initiatives with organizational goals and risk appetite
- Establish and maintain an information security governance framework
- Identify and manage information risk to acceptable levels
- Design and implement an information security program
- Develop and oversee incident response plans and procedures
