Build Intelligent Applications (AB-410) Training

Microsoft Authorized Training · Applied Technology Academy

This course teaches learners how to design and build intelligent applications on the Microsoft Power Platform by using AI, copilots, and agents to solve real business problems. Learners explore how Power Apps, Power Automate, Power Pages, Copilot Studio, and AI-enabled capabilities work together to create agent-first, AI-enhanced solutions that improve productivity, decision-making, and user experience.

LEVEL **Intermediate**	DURATION **3 days**	DELIVERY **Instructor-led - Online Live or classroom**	CERTIFICATION **Microsoft Certified: Intelligent Applications Builder Associate**

Course Outline

- **Module 1: Design and model solutions on Power Platform**
- **Module 2: Build a data model with Microsoft Dataverse**
- **Module 3: Build apps and portals with Power Apps**
- **Module 4: Automate business processes with Power Automate**

Intended Audience

This course is designed for individuals who want to learn how to build intelligent applications using the Microsoft Power Platform and are new to using AI, copilots, and agents in solution design. It is ideal for learners with a general understanding of business processes or app building who want to develop the skills to analyze requirements, select appropriate Power Platform components, and create AI-enhanced solutions. The course introduces how AI and agents can improve application behavior, automation, and user experience, while also building awareness of governance and responsible use as learners begin their journey into intelligent app development.
